

JAKAB SZIMÓNA

Mechatronics engineer

Summary

I am a mechatronics engineer motivated by engineering challenges. I have worked with robotics, microcontrollers, and my own IoT projects. I enjoy working independently, learning new technologies, and tackling real-world engineering problems. I approach my tasks with a precise, hands-on mindset.

Örbottyán, Budapest

EDUCATION

BSc in Mechatronics Engineering

Óbuda University

2018 - 2022

MSc in Mechatronics Engineering

Budapest University of Technology

and Economics

2022 - 2025

EXPERIENCE

Engineer intern - 2022

Zollner Kft. - Vác

- preparing assembly instructions, providing documentation support
- interpreting technical drawings and process descriptions

SKILLS

Programming

- C#, C++, Python
- Git based version control
- Microcontroller programming (Arduino, ESP32, STM32)
- Basic PLC programming
- MATLAB

Robotics and Automation

- Robot programming (Yaskawa, Universal Robots)
- Robot simulation and offline programming (ABB RobotStudio)
- Experience with Linux systems (ROS noetic, Rviz, Gazebo)

CAD and Design

- Autodesk Inventor
- Fusion 360
- 3D design and modeling

Electronics and Manufacturing

- Soldering and electronic assembly
- Design and development of electronic prototypes
- 3D printing

Other

- Category B driving licence
- Creative and detail-oriented mindset
- Fast learner

LANGUAGE SKILLS

- Hungarian - native language
- English - B2
- Italian -basic
